Although Thompson expressed himself at the failure of Sullivan to countersign register of the treasury, yet he used no unkind words. He says the reason he did not communicate the appointment of Mr. Thompson was because he did not deem it his duty to do so prior to the accept ance, which was doubtful.

MONDAY MORNING APRIL 1 1878

PROBABILITY OF WAR

England and Russia confront each other in most menacing attitude It is difficult to see how another forward step can be taken by either power without precipitating war Yet can the powers long occupy their present relative position toward each other for any little act of additional exasperation is liable to produce a collision at any moment England declines to retire her fleet and Russia with equal firmness refuses to withdraw her armies In both countries public sentiment has been roused to the pitch of war and journals and statesmen whose utterances have hitherto been uniformly pacific now speak a language which refuses further concessions and betokens a convict on that war cannot be avoided Notes of preparation for war resound throughout England great land forces are organizing to be in readiness to cooperate with the fleet the nation which has been slow to make war, it is evident is fully resolved at last, and unless Russia yields somewhat of her pretensions the struggle must begin But of Russian concession there is no sign There is evident determination on the part of Russia to hold the advantageous positions she has won Turkey now is virtually a dependency of Russia The weakness of the Turk and his bitterness toward England for alleged want of faith has made him an ally of the emperor of Muscovy and the task which England proposes to herself is to rescue the sultan from this dependent condition and to support the independence of the Ottoman empire. In this purpose England appears to stand alone Austria is the state from which assistance might naturally be expected but tardy and fickle Austria appears to have been quieted, perhaps by an offer from Russia of a portion of the Turkish spoils So England stands alone But here is the strength of the Anglo Saxon and his tenacity of purpose, backed by financial resources which, notwithstanding a vast debt, are still superior to those of any other nation under the sun and certainly equal to any strain that even so great a war could put upon them.

Russia is weak in her finances is burdened with a heavy debt and cursed with an irredeemable paper currency But the empire has immense resources its soldiery is the most numerous in the world, and the power of the state over the lives and property of its subjects is absolute The collected might of the empire is therefore at the disposal of the czar; and the general temper of the people is that of unquestioning submission and obedience. Besides, Russia has great advantages in the positions she has gained about the Dardanelles and Bosporus Unless England shall be able to force the straits and gain command of the Black Sea, and at the same time secure the co-operation of Austria for an attack on Russia's line of communication by land, it may be doubtful whether the troops of the czar can be dislodged from the positions they hold. Yet it is not impossible that the efforts of England might detach Turkey from her Russian alliance. A British army in Turkey would in that case be a rallying point for the Ottoman soldiery and British money and British fear enough would probably move the Turks to an effort for their own deliverance Russia would hardly be able to place much reliance on the conquered nation as an ally, after England had got well at her work

There is now little reason or room for speculation as to whether there will be war or not. One power or the other, or both, must recede, or the conflict must ensue. The world waits with suspense An announcement of war would send a tremor to all the ends of the earth.

ANOTHER CHANGE IN THE BILL

Mitchell has been driven from the most absurd of his propositions on the railroad question He could not get his bill through the committee, because in the shape in which it was presented it was seen to be totally impossible for any company to build under it Grover and Willis as wanted a bill that would not forbid at the outset all hope of everything, and the result seems to be the bill now reported, though in this shape it probably is not just what they desired. Possibly if this bill should pass it would afford some aid for a road; yet the great results it proposes need not be expected from it Should it become a law the Northern Pacific would be likely to begin at the mouth of Snake river and build toward the east, for the present neglecting entirely the portage roads and the division from Portland to Umatilla. The company would thereby only forfeit the grant between these points, which would not bring money enough to build half a mile of road It could do this with perfect assurance that no other company would build the portage links and consequently the difficult and expensive line along the Columbia river. If Col Chapman should desire to put his surplus capital into this part of the road he would be at liberty to do so, and then under the terms of the bill the Northern Pacific could use the road, should it use it. But if he wants to do this he might as well proceed without this bill as with it, for the bill grants nothing for this part of the road.

To suppose that the proposition, even as it now stands, implies that any company will build at once along the Columbia river, or construct the portage roads in the way prescribed, would be ridiculous Let it be borne in mind that no grant can furnish any resources for construction of this part of the road now Any company that should attempt it would lay out a great sum of money directly in competition with roads now in operation at the portages. To build other roads there would cost many times what it has cost to establish existing ones so narrow is the pass and nobody would ever be willing to undertake the construction of a road along the river under the restrictions and entanglements which this bill would create These conditions, therefore will be a dead letter But the Northern Pacific might be able to go on from the month of Snake river toward the east, and perhaps some little aid might be had for a beginning of a road toward Salt Lake. There would be a chance then to gain something The provision in regard to the lands which allows title to be made to the company as sections of the road are built is a concession of value which was not in the former bill

There is grave doubt whether this bill can pass. It however, presents fewer impediments to a railroad than the one which Mr Mitchell proposed But all the portions relating to the portage roads are for this time we regret to say, so much surplusage We shouldn't expect any company to build them within the time prescribed simply because it would not be a business enterprise

FAILURE OF DISCIPLINE

An attempt to discipline the four or five Republicans who form the "Hayes party" in the senate was made once more in caucus on Saturday; but it failed as heretofore. There was something like angry altercation when these four or five were charged with abandoning their party and joining the Democrats to carry the president's nominations through but the Hayes guard withstood the reproaches and repelled them with manly scorn With a year this matter will assume a new and entirely different aspect The president will be obliged to depend entirely on the Democrats of the senate He must please them with his nominations then for he can get nobody confirmed whom they do not approve An estranged and hostile Republican minority will not be disposed to help him Looking to the next election the Democrats of the senate will devote all their efforts to building up their own party and widening the breach among their opponents

Proceedings in the caucus at first were a very threatening look but finally for the sake of the party the injured Republican statesmen of the senate who can't get appointments made to suit them decided to drop the business for the present So amid great patience and long suffering they will still bear with Hayes but they are sure the party will receive dreadful injuries in consequence of his violations of their wishes in the matter of appointments

Among that small and select company to whom belongs the right to make the Republican nominations there is a good deal of canvassing these times for a suitable candidate for governor The principal requirement is that he be a person who certainly will not be in the way of Mr Mitchell's re election to the senate but whose candidacy on the contrary will help that matter forward In order to secure perfect harmony in the party it would be well also to select the candidate for congress on the same principle Doubtless however the suggestion is superfluous since the matter must have received full consideration already by those to whom the right of making the nominations belongs

Now the question is who is credulous enough to suppose that in case the bill now reported should pass a road would be built from Umatilla to Salt Lake within five years And where is the man who would take stock to the amount of one hundred dollars and pay over his money?

REMOVAL SALE

SPRING GOODS!

IN ADDRESSING THE PUBLIC ON THIS OCcasion we do so with more confidence than at any time since our advent into business Our career in business has been singularly successful having attained a degree of enviable notoriety for straightforward dealing selling goods at a slight margin on importers prices

OUR STOCK for the Spring Trade is one of the best selected and the most complete ever before offered to the people of Oregon—bought on the most advantageous terms and embracing every line in the trade

In disposing of this immense Stock our conduct shall be guided by the same golden rule as heretofore—**Honest dealing and the Smallest Living Profits**

Our patrons embrace a large number of the Northwestern population and in sending out our

SPRING GREETING

we hope to see or hear from all our old friends and as many new ones as wish to avail themselves of this opportunity of purchasing goods cheaper than ever before offered in the Metropolis of the North west

Our facilities this year have been peculiarly favorable for purchasing having through our friends of the Bay City had the chance of picking up special lines suitable for this market at prices for which manufacturers could not begin to produce them This in a great measure is caused by the almost general stagnation of business in the leading markets of the United States and more directly affecting the Pacific States from the hard times they have had and are having, in San Francisco The consequence is the merchants there must unload their heavy stocks and in many cases at a great sacrifice

Fully realizing the situation our MR HERRON hastened out and purchased an

IMMENSE STOCK!

More than in ordinary times he would have been justified in buying but the low prices he obtained them at will enable us to spread them over this State and the Territories at such a reduction on old time prices as will convince the most skeptical that we mean business and business we

Must and Will Do!

It would be useless attempting to give a List of Prices Space does not warrant it. But we shall forward samples to any of our country friends who send for them

The public in dealing with us can place implicit faith in the fact that the lowest prices are asked All goods are marked in plain figures from which there can be no deviation thus placing the inexperienced on equal terms with the experienced in the purchase of goods

Our country friends would do well to reap the advantage of an early inspection of our Warehouse it is incumbent on us to make room We are crowded and we must move goods off to make way for fresh contracts to arrive by every Steamer during all April

We have advices of a shipment of Goods from Glasgow direct now fully due and daily expected

AN OLD PORT ORDER Mr C D Burch an old and well known citizen of Portland returned to this city after a long absence Saturday evening Mr Burch resided in this city for many years where he carried on a very extensive business and was generally esteemed Having disposed of his interests here he removed to Marysville California Here also he was successful until a short time since when he sold out and returned to Portland During his residence in California he purchased a large tract of land and has returned with the declared intention of making it a permanent residence Mr Burch says that the weather in California is too warm and the climate too unhealthful in the summer months After a residence in the golden state of California of over twenty years he declares Oregon is good enough for him and has returned to Portland During his residence in California Mr Burch says that he has not been sick a day and has returned in perfect health and strength Mr Burch has a large circle of friends in this city who will be pleased to learn of his return and will cordially welcome him back to Portland and friends will cordially welcome him back to the city of his adoption Somehow or other, they say I will come back to Webfoot

THINGS TRUE WISE AND OTHERWISE.

A correspondent sends us the following excerpts culled from the Dictionary of Phrase and Fable by E Cobham Brewer, LL D

EASTER—April was called Ostermonath—the month of the East wind (wind from the east.) Easter is therefore the April feast which lasted eight days. Our Easter Sunday is the first Sunday after the first full moon after the 21st of March. It may fall as early as the 22d of March or as late as the 25th of April. The present year it will be the 21st of April.

EASTER EGGS—Easter eggs or Pasch eggs are symbolical of creation or the re creation of spring The practice of presenting eggs to our friends at Easter is Magian or Persian, and bears allusion to the mundane egg from which Ormuzd and Ahriman were to contend until the consummation of all things It prevailed also among the Jews Egyptians and Hindoos Christianity adopted the custom to symbolize the resurrection and they color the eggs red in allusion to the blood of their redemption There is a tradition, a so that the world was "hatched" or created at Easter tide.

"Bless Lord this thy creature of eggs that it may become a wholesome sustenance to thy faithful servants eating it in thankfulness to them on account of the resurrection of our Lord." Pope Paul V Ritual.

OREGON

The grand jury of Jackson at the recent session of the court did not return a single bill

Recently three Chinamen were drowned while attempting to cross Rogue river at Tyee bar and the latter was frozen to death while crossing a mountain in that vicinity

A Jacksonville paper says Martin Koster of Foot creek recently found a nugget in his claim weighing 3½ pounds worth about $700 The day previous he found a piece worth $42. Who says our mines have "given out?"

Lindsay DeLashmutt murdered or robbing a safe in charge of Geo A Sheppard at Sheridan Yamhill county court last November was tried at Lafayette last week and on Saturday the jury returned a verdict of not guilty" Proof of his innocence raises divers and sundry suspicions elsewhere

Jacksonville *Sentinel* Adam Shippel will start for his old home in Missouri some time next month and expects to return to this valley with his family some time next summer and make this his permanent residence Mr. K. seems very much pleased with our climate and general prospects He is a brother of Henry Klippel well known throughout Oregon

From the *Standard* we learn that the Democrats of Marion on Saturday elected the following delegates to their state convention Geo A. Cutting, A Sharples W R Munkers R H Dearborn, Geo S Downing Nathan Young, Spencer Dudley P K Murphy W H Byrd James Casey and J R Coleman The county nominations were postponed until the 26th of April

THE TERRITORIES

Indians on Puyallup reservation are busy clearing and planting and this year will cultivate more land than ever before

A cheese factory will be started in Chimacum valley, says the Port Townsend *Argus*, which will turn out from 700 to 800 pounds of cheese a day.

The steamer *Wenat* sunk in the Duwamish river the other day with thirty tons of potatoes on board Bad luck when potatoes are worth a dollar a bushel

The San Juan lime company has contracted with the Puget Sound manufacturing company at Puyallup for the manufacture of its barrels for the next year, which will amount to about seventeen thousand all told

In the garden of W N Bell of Seattle is a tea plant about eighteen inches high which has been in all leaf all of the past winter thus proving conclusively that tea can be successfully cultivated on Puget Sound This specimen came from the agricultural department at Washington

A most wonderful treasure deposit has been discovered in Montana It is up in the mountains some twenty miles from Helena A shaft fifteen feet square has been sunk fifty feet deep, and out of this hole above sixty thousand dollars have been mined The metal is gold and the ore does not fall below $800 a ton. Much of it goes above $1,000 Its extent as prospected indicates that it may be the richest mine in the world.

Gold Field of Southern Oregon.

[From the Jacksonville Sentinel.]

The very light estimate usually placed on the gold yield of Jackson and Josephine counties by writers on Oregon has induced us to make inquiry into the subject. There is no way to ascertain with certainty what the actual yield has been during the past 20 years, but from the most reliable sources of information we are satisfied that it has been greatly in the interest usually estimated. One individual alone, Mr C C Beckman of this place informs us that he has, for himself and the Express company, handled over ten million dollars worth of gold dust, the largest portion of which was taken from Rich gulch, Jackson, Jacksonville and Sterling creeks. From his intimate knowledge of the business of other buyers, and from information derived from other sources in Josephine county, Mr Beckman gives a decided opinion that at least as much more has passed through other hands from that date up to the present. This would give us an average yield of eight hundred thousand dollars per annum for the two counties, and when the really small amount of ground worked over is considered an approximation of the probable returns yield of gold in Southern Oregon would seem fabulous and incredible. Hydraulic mining is proving successful wherever sufficient water can be obtained, and it seems as if mining in this end of the state is but only just commencing

Olympia and Tenino Railroad--Iron and Rolling Stock Purchased.

[From the Olympia Transcript.]

Our citizens have been considerably elated over the prospects of the Olympia and Tenino Railroad this week. On Tuesday the directors received a dispatch from Mr E W Quimette, stating that he had purchased the iron for the road. Wednesday they received another dispatch announcing the information that he had purchased a locomotive and the tracks for several cars, and had shipped them for this place. The directors have called a meeting on Monday evening next to make arrangements for beginning work, and we presume that before the summer is ended the road will be completed and trains running. Mr Quimette is entitled to the thanks of this community for his untiring efforts in behalf of the road since the new company was organized, and his success in procuring material at this time is worthy of highest commendation.

The Northern Pacific Railroad.

[Special to the Oregonian, March 30th.]

The officials of the Northern Pacific Railroad are confident that the bill for the extension of time for the building of the line will surely pass both houses of congress. The only question of importance to exist is the time to be granted from its passage. Twenty five miles to the Dakota coal fields. The passenger and freight business of the road is reported to be rapidly increasing. Monday an express train from St. Paul to Bismarck was put on, to be used for the benefit of the Black Hills trade and the time between Deadwood and Chicago has been reduced to eighty hours. The great wheat growers along the line are busily engaged in plowing and seeding. Dalrymple, one of the baronial wheat growers, has already plowed up some 15,000 acres.

To the Unfortunate

DR. DIEBOLD

Established in San Francisco 1853. Has had more than 25 years experience in the treatment of Chronic, Nervous, Blood and Skin Diseases, and has cured, or relieved, more cases than any other physician on the Pacific Coast.

SEMINAL WEAKNESS.

Seminal Emissions, the consequence of Self Abuse. This solitary vice, or disposition practiced by the youth of both sexes to an unlimited extent, producing, in many instances, the following train of evils, if not combatted by scientific medical treatment: Pimples on the face, low countenance, dark spots under the eyes, loss of the beard, falling of the hair, weakness of the limbs, blunted perceptions, loss of memory, lassitude, trembling, palpitation of the heart, blushing, bashfulness, timidity, nervousness, dizziness of the head, ringing in the ears, dimness of sight, loss of memory, universal lassitude of the whole system, weakness of the generative organs, sexual impotency, nocturnal emissions, and seminal losses, frequently attended by the most alarming symptoms, which, if allowed to progress, as they surely will, the mind becomes seriously affected, confusion of ideas, loss of confidence, self distrust, dislike of society, gloomy forebodings, love of solitude, timidity, etc., are some of the evils produced. Young men, and those contemplating marriage, who are aware of physical weakness, should immediately consult Dr. Diebold, and be restored to perfect health and vigor. Marriage, or the duties of married life, entered into without a sound mind and body, is productive of the most deplorable results. Many a young man has committed suicide, or fallen a victim to consumption, who might have been restored to perfect health by timely application. Dr. Diebold's extensive practice enables him to treat these cases with a success unknown to any other physician on the Coast. Many cases of Impotency, Sterility, Spermatorrhœa, Gleet, Stricture, Syphilis, Gonorrhœa, Gleet, Stricture, Syphilis, Gonorrhœa, Gleet, Stricture, Syphilis, Gon
